

Audience Behavior & Engagement Report — Q1 2025

Data Science Division | StreamVerse Entertainment

Key Findings

Analysis of 2 million watch events in Q1 2025 reveals clear behavioral patterns. The 25-34 age group is the most engaged segment, accounting for 38% of total watch time. Premium subscribers have 2.4x higher completion rates than Free-tier users. Mobile is the dominant platform at 52% of sessions, followed by Smart TV at 28%. Peak viewing hours are 9PM to 11PM IST on weekdays, and 3PM to 11PM on weekends.

Engagement by Age Group

Age Group	Avg Sessions/Month	Avg Completion %	Top Genre	Churn Risk
18-24	14.2	61%	Sci-Fi	High
25-34	18.7	74%	Drama	Low
35-44	15.3	71%	Thriller	Medium
45-54	10.1	68%	Drama	Medium
55+	6.4	79%	Drama	Low

City-Level Engagement

Mumbai leads in total engagement volume with the highest number of Premium subscribers. Bangalore shows the fastest month-over-month growth at 18% in Q1 2025. Hyderabad is emerging as a key market with strong appetite for Telugu-language content. Delhi shows high viewership but lower completion rates, suggesting content-audience mismatch. Tier-2 cities (Pune, Ahmedabad) are growing rapidly and should be targeted in Q2 campaigns.

Comedy Genre — Audience Behavior Analysis

Comedy titles consistently show the lowest completion rates (avg 48%) and highest early drop-off (35% of viewers exit within first 20 minutes). Sentiment analysis of reviews reveals frequent mentions of 'predictable', 'not funny', and 'poor writing'. The 18-24 segment, which consumes the most Comedy content, gives it an average score of 5.1. This data strongly suggests a content quality problem rather than a genre preference issue — audiences want good comedy, but current titles are not delivering.

Recommendations

1. Personalize recommendations for 25-34 segment — highest LTV cohort.
2. Introduce offline download feature to capture Tier-2 city growth.
3. Invest in Comedy writing talent before commissioning new titles.
4. Launch Smart TV optimized UI — second fastest growing platform.
5. Create dedicated Telugu content section for Hyderabad market.
